DETAILED ACTION

Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-21 and 31-38, drawn to a vehivle structure, classified in class 296.
 - II. Claims 23-24, drawn to windshield projected display, classified in class 345
 - III. Claims 25-30, drawn to a passenger air cushion system, classified in class 280.
- The inventions are distinct, each from the other because of the following reasons:

 Inventions I, II and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each invention has separate utility in a motor vehicle without the use of the other two inventions. See MPEP § 806.05(d).
- Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3612

- Because these inventions are distinct for the reasons given above and the search required for each Group is not required for the other Groups, restriction for examination purposes as indicated is proper.
- Applicant is advised that the reply to this requirement to be complete must include an 5. election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
